

# Preventing Severe Retinopathy of Prematurity (ROP): Medical and Nutritional Intervention Considerations in the Extremely Preterm Infant

## PLEASE JOIN US:

### DATE:

Sunday, December 5, 2021  
at 12:00 PM ET

### LOCATION:

Maryland Ballroom C/D  
Gaylord National Harbor Hotel  
National Harbor, MD

### PRESENTER:

Talkad Raghuveer, MBBS, DCH,  
MD, FAAP  
Professor  
Department of Pediatrics  
University of Kansas School of  
Medicine at Wichita

## MEETING OBJECTIVES:

- Review the current incidence of severe ROP
- Describe the visual and neurocognitive long-term outcomes associated with severe ROP in preterm infants
- Review current treatment practices and associated outcomes for ROP
- Understand the pathophysiology of ROP to develop strategies to prevent ROP
- Review the current understanding of oxygen monitoring to prevent ROP
- Apply current understanding of nutrition interventions for the premature infant and key nutrient deficiencies that may be associated with risk for severe ROP including DHA and ARA

## REGISTRATION:

This accredited education program will be no charge to participants. Space at the hotel is limited. To confirm your attendance and participation in this event, please register through the link below.
