

Comprehensive Management of the Infant Gut Microbiome Leads to Restored Function & Improved Clinical Outcomes in NICU Infants

The speakers will share:

- Key components to stabilizing the neonatal gut during the NICU stay
- Proactively addressing the gut microbiome is critical in the NICU
- Comprehensive management of the gut microbiome with *B. infantis* EVC001 leads to a spectrum of improved clinical outcomes in NICU infants
- Clinical outcomes are driven by changes to the gut microbiome through a specific mechanism

Registration for the dinner symposium is **limited** to registered Hot Topics Conference attendees who are Neonatologists, Neonatal Nurse Practitioners, Neonatal Nurses and Neonatal Dietitians. As part of this dinner symposium, attendees within the United States will receive complimentary dinner delivered through Grubhub. Grubhub is currently available in over 4,000 U.S. cities. Details provided upon registration.
