

Exclusive Human Milk Diets in High-Risk Neonates: Evidence & Experience

Tuesday, December 12, 2023 • 12:15 PM to 1:15 PM
Gaylord National Harbor, Room National Harbor 2/3

Learning Objectives:

- Describe the exclusive human milk diet as a cost-effective strategy to lower hospital costs
- Evaluate data from real-world implementation of an exclusive human milk diet across several hospitals
- Review barriers to implementing an exclusive human milk diet and address possible solutions
- Discuss the benefits of an exclusive human milk diet in high-risk infants

Join us for a live presentation led by Dr. Jonathan Swanson on pre and post real-world implementation data that illustrates the cost-effectiveness and clinical benefits of an exclusive human milk diet (EHMD) in high-risk neonates. Take part in an interactive panel discussion that includes clinical and financial experiences from multiple centers demonstrating the need to evolve the standard of nutritional care in the NICU.

Presenter:

Jonathan Swanson
MD, MSc, FAAP

Professor of Pediatrics, Chief Quality Officer for Children's Services and Medical Director for the Neonatal Intensive Care Unit (NICU)

University of Virginia Children's Hospital in Charlottesville, VA

Panelists:

Jenny Fox
MD, MPH, IBCLC

Associate Professor of Neonatology
Children's Hospital of Richmond at Virginia Commonwealth University
Children's Hospital of Richmond at Virginia Commonwealth University
Richmond, Virginia

Jenelle Ferry
MD

Neonatologist, Director of Feeding, Nutrition, and Infant Development

Pediatrix Medical Group of Florida and St. Joseph's Women's Hospital

Moderator:

Erin Hamilton Spence
MD, IBCLC, FAAP, FABM

Director, Clinical Education and Professional Development
